

C 70

C Series Architectural Speakers

The **C 70** is a unique single point stereo speaker for small spaces in need of big sound. Utilizing a precision audio transformer, the C 70 is the world's only dual channel speaker to use a single tweeter to achieve superior dispersion and smoother response. Whether it's music or movies the C 70 will bring your home or office to life with uncompromising sound quality, virtually invisible installation and exceptional value. Enjoy!

Features

- 2 Channel speaker with single tweeter and woofer voice coil for superior frequency response and uniform dispersion
- 6-1/2" Extended throw polypropylene-mica cone woofer with durable Santoprene surround
- Pivoting 1" aluminum dome tweeter that utilizes ferrofluid for damping/cooling and increased power handling
- Foam reflection-absorption ring around tweeter assembly
- 12 dB/octave crossover network with premium parts
- Acoustically transparent, fine mesh grill with paint shield
- Woven dust screen to protect woofer from in-wall debris
- Four-point "dog-leg" mounting system
- Optional NCK-3M New Construction Kit
- Parasound 10 years parts, 5 years labor warranty

Specifications

- Frequency response: 58Hz - 22kHz +/- 3dB
- Nominal impedance: 8Ω, 1 or 2 channels driven
- Minimum impedance: 6Ω
- Sensitivity: 89dB 1 watt/1 meter
- Power range: 10 - 70 watts, each channel
- Woofer size: 6-1/2"
- Woofer cone material: Polypropylene-mica
- Surround material: Santoprene
- Tweeter size/material: 1" aluminum dome
- Cut-out hole diameter: 7-5/8"
- Outer diameter of frame: 9"
